

Outline of proposals for consideration by Intrapartum Clinical Study Group

We are eager to support good quality research in Intrapartum care and anticipate that studies will also include exploration of women's views and experiences.

You can send us research ideas at any stage of their development from

- a one-line idea
- as much detail as you can fill in on the titles below
- a completed outline or full proposal

Meeting dates are 8th September 2011, 10th January and 18th May 2012 in Birmingham and proposals should be submitted 4 weeks before meetings. We would be delighted if you want to attend the CSG meeting (either in person or by telephone) when we review your proposal.

These are the headings we will need information on to enable us to offer our comments. If you have completed an outline proposal form for the HTA we are happy to see that to save you additional work.

- **Project title**
- **Current evidence**
- **Study design**
- **Participants**
- **Intervention / Comparator**
- **Outcomes; Primary and Secondary**
- **Sample size required (if calculated)**
- **Proposed user involvement**
- **Is this a NICE research recommendation?**
- **Which Clinical Trials Unit (CTU) is working with you on this project (if relevant)?**
- **Who are the investigators?**
- **Which funding body do you intend to submit this proposal to?**

For qualitative studies we need details of your sampling strategy and methods of analysis.

Please identify any issues where you think the CSG could help with your study eg study design, additional expertise.

We will also look at whether the idea fits within our research priorities, whether it is of clinical relevance and whether we believe clinicians will be able to recruit.

Please email s.kenyon@bham.ac.uk for more information or to become a member of the Working Group

or send to Sara Kenyon, Public Health Building, School of Health and Population Sciences, Edgbaston Campus, University of Birmingham, Edgbaston, B15 2TT
