Second International Conference on
In Utero Transplantation & Fetal Gene Therapy

9th & 10th October 2015

This two day conference will cover the very latest research on in utero transplantation, fetal immunology and fetal gene therapy. Following the successful inaugural international conference in San Francisco in April 2014, the theme of this second meeting is “Translating fetal stem cell and gene therapies into the clinic”.

Hear the latest research on treating haemoglobinopathies and brittle bone diseases using fetal approaches. Understand recent discoveries about the developing fetal immune system.

Kennedy Lecture Theatre
UCL Institute of Child Health
30 Guilford Street
London WC1N 1EH UK
